DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-16, drawn to processing information from multiple context providers to determine a current device context, classified in class 455, subclass 414.1.
- II. Claims 17-59, drawn to providing a current device location, classified in class 455, subclass 456.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions 1 and 2 are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because it can be used to determine information relative to a location. The subcombination has separate utility such as determining the specific location of a device.
